

Woof Expanded Potions

A Minecraft mod that expands the vanilla potion system with stronger, longer-lasting, and entirely new potion variants. This includes resistance and haste potions missing from the base game, combo potions, and permanent-duration utility brews.

Potions are crafted in the brewing stand using a tiered ingredient system: Dusts unlock Potent-tier upgrades, Tonics unlock Extreme-tier upgrades, and Duration Mixes extend any Full-tier potion to Everlasting. Combination potions always last longer than their components to reward the effort of mixing.
